**"The most dangerous place to be for an African-American is in the womb."**

You should have held your ground. The statistics alone should have been sufficient to take a stand against Reverend Al Sharpton, no good President Obama, and the like. The record does reflect that more than any other ethnic group more Black children are being killed or maimed, more Black families are being broken up.....

.....many of this being done by the sleaze and greed of the Black middleclass to make a profit at the expense of law abiding Black families, and/or liberals who do not give a rat's @ss about the Black community.
